

**IT DOES MORE.....IT COSTS LESS**

**Description:**

Conveniently enjoy stereophonic quality of sound and video on the big screen of the LCD, projector or TV with the help of EiRA HDMI to VGA converter. This ultra-modern HDMI to VGA converter has been exclusively created to transfer and convert HDMI signals of HDMI-enabled digital devices to VGA signals with audio output. As a result, you can view full format HD motion pictures, videos, photo albums and other images on your LED or LCD TV. You can set up the HDMI to VGA converter almost instantaneously and quite significantly as it does not require additional electrical supply for operation. You can keep using your older monitors with new devices.
