Work Better. Live Healthier

### **Product Highlights:**

- Powerful, reliable, and endlessly versatile, this Standing Desk Frame allows you to rise to the level of the work you do.
- This steel frame, sealed with a powder-coat finish, allows you to supply your own desktop.
- Motor lift mechanism offers smoother height adjustments, better stabilization, high weight capability (up to 120kg) and low noise (under 45 dBs) while running.
- Our advanced digital memory keypad stores up to four heights, allowing you to switch between sitting and standing with a quick touch of a button. Your exact desk height is shown on a display that automatically goes dark to reduce power draw while the desk is stationary. This advanced keypad is an upgrade to the standard two-button up/down keypad.
- Sitting all day puts stress on your body just as standing all day does. Studies recommend that you start your day standing, sit when your feet get tired, and limit sitting to 30-minute sessions. Most studies are now recommending 2-4 hours of standing per 8-hour day. As a bonus, you burn about 50 extra calories per hour when you are standing versus sitting.

# HEIGHT ADJUSTABLE DESK FRAME (ELECTRIC SIT STAND DESK BASE) (FRAME ONLY)

## Technical Specifications:

<b>Brand</b>	<b>EiRA</b>
<b>SKU Code</b>	ER2401B
