

## **Product Highlights:**

- This USB Type-C to VGA converter is for mirroring your MacBook, Chromebook or any other USB type-C equipped computers, tablets to a VGA supported Projector or monitor for a large screen display by converting the USB video signal through a built-in chip.
- **Support USB 3.1:** Fool-Proof and reversible USB-C connector provides convenience to plug in either direction.
- **Support HD Video:** The handy converter supports resolution up to 1080p (1920x1080 at 60 Hz) for full high definition video, which ensures clarity and detail when it comes to anything from gaming to watching movies.
- Superior conductivity & High Speed provides more stable signal transmission.
- **Special Design & Finish:** High-end anodizing aluminum case ensures durability, heat dissipation, EMI protection and well matches the Mac Style.
- Portable and Lightweight design makes it a convenient accessory for conference, presentation and more multi display operation expanding your workspace and boost the productivity. (Does not include the VGA cable).
- **Plug & Play:** No additional drivers or installation required.

**Technical Specifications:**

<b>Brand</b>	EiRA
<b>SKU Code</b>	ER-2005
<b>Product Name</b>	USB Type-C to VGA Converter- ALTIMA
<b>Colour</b>	Metallic Silver
<b>Connector</b>	USB Type-C to VGA
<b>Material</b>	Aluminum
<b>Resolution</b>	1920*1080@60Hz
<b>Input Interface</b>	Reversible USB Type-C Male Connector
<b>Output Interface</b>	VGA Female Connector
<b>Connector</b>	One Step Forming Gold Plated Connector
<b>Cable</b>	Built-in
<b>Dimensions</b>	4.3 x 3.8 x 1.4 cm
<b>Weight</b>	40 gms
<b>Compatibility</b>	Supports Mac, Windows and Android* (Selected Models)
<b>Warranty*</b>	1 year
